### MAUREEN O'KANE Guest Speaker, Aug. 6, 2011 Anacortes Adventist Fellowship

We are part of a solar system where each planet and moon has unique features that set it apart. Together, they have an important lesson for us to learn. With beautiful images from telescopes, orbiters, and rovers, you will learn about:

- \* Ancient & Active Volcanoes
- \* Highest Mountain
- \* Largest Hurricane
- \* Methane Lakes
- \* Deepest Canyon
- \* Talking Geysers
- \* Martian Blueberries
- \* Our Sun in Real Time
- \* Monster Waves
- \* Enormous Infra-red Ring
- Mysterious Orbiting Lumps
- 

Maureen O'Kane first became interested in the stars when she was a teen, but her passion was truly sparked after hearing Luther Clendenon's presentation on Bible Astronomy. She purchased Luther's slide sets and began sharing them at schools, churches, campgrounds, and the Washington State Penitentiary.

With Hubble Space Telescope's incredible images, she transitioned from slides to

Power Point, but the real heart of the presentation is what our solar system tells us about our God, what He longs to do for us, and how His Word is still relevant for today's people.
